### **Deterrence In The Second Nuclear**

Deterrence theory is the idea that an inferior force, by virtue of the destructive power of the force's weapons, could deter a more powerful adversary, provided that this force could be protected against destruction by a surprise attack. This doctrine gained increased prominence as a military strategy during the Cold War with regard to the use of nuclear weapons and is related to, but distinct ...

### **Deterrence theory - Wikipedia**

Deterrence is the rationale used by the nuclear weapons states to justify their weapons. The argument says that if a nation has capability to inflict unacceptable damage on another, then the latter will refrain from attacking the former—it will be deterred from doing so

### **Deterrence, doctrine and strategy | Nuclear Darkness ...**

Nuclear deterrent composition. The doctrine of mutual assured destruction (MAD) assumes that a nuclear deterrent force must be credible and survivable. That is, each deterrent force must survive a first strike with sufficient capability to effectively destroy the other country in a second strike. Therefore, a first strike would be suicidal for the launching country.

### **Nuclear strategy - Wikipedia**

For a time after World War II, America held the upper hand with regards to nuclear superiority. It used this threat of "massive retaliation" as a means to deter Soviet aggression. By the late 1950s the Soviet Union had built up a convincing nuclear arsenal that could be delivered on the territory of the United States and Western Europe. By the mid-1960s unilateral deterrence gave way to ...
