Diagnostic approach. Most tests of hemostasis are designed to detect causes of hemorrhage or hypocoagulability and are insensitive to accelerated clotting (hypercoagulability, which predisposes to thrombosis). Some global assays (TEG/TEM) can evaluate fibrinolysis as well as clot formation and have been reported to detect hypo-...

**Diagnostic approach | eClinpath**

Diagnostic Hematology approaches the topic from the clinical decision-making perspective. It stresses the importance of effective, patient-centered care of hematological patients, requiring a comprehensive clinical insight into the disease processes, and thus provides an integrated clinical and pathological approach.
